

Educational Trip

K G - A

I went to Victoria Memorial with my friends and my teacher on 31.1.25.

I was captivated by the exhibits at the museum and could not stop asking questions. I enjoyed sharing my tiffin with my friends and playing with them. My teacher took great care of me during the trip. I would like to thank my teacher and mashi for helping me.

K G - B

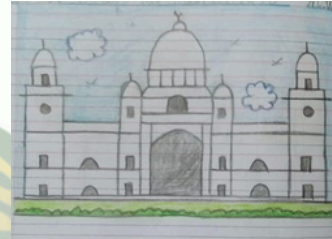

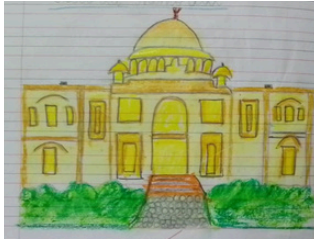

A school picnic is remembered with laughter, fun and the joy of spending time with friends outside the class. The moments of piling into the bus, playing games, running, sharing snacks with friends filled me with excitement.

Teachers said it was the famous Victoria Memorial where we were standing. The open fields, lush of greenery and colourful flowers was enough to mark the start to a beautiful day. It was a day of boundless freedom and creating everlasting memories with friends and teachers. It ended with a note of satisfaction of a dream coming true of my first ever school picnic.

I - A

On the 31st of January, I went on an educational tour to Victoria Memorial with my teacher Ms. V Chapman and classmates. I was very excited and also a bit worried about the trip as it was my first trip without my mother. I visited the museum and then explored the gardens. At the museum I saw a statue of Queen Mary, Queen Victoria and Lord Curzon. I also met a guide who told us that Queen Victoria was empress of India from 1896 to 1901. It was built by Lord Curzon. It is made of white marble and has a bronze angel with a bugle on top of the building. Later we sat down together at a garden and ate our tiffin together. I enjoyed the trip under the guidance of my teacher and eagerly await for my next educational trip organized by my school.

I - B

We went on our first educational trip to Victoria Memorial with my Class Teacher, Mrs. Harry and all my friends on 31st January, 2025. Classes' kg-4 boarded the bus along with their class teachers, We reached the destination by bus to visit the beautiful monument. We were so happy to see the white marble palace built in the memory of Queen Victoria. The Victoria Memorial is surrounded with garden and lakes; there were pebbles all around the monuments. Inside the museum we saw many things from the past; In the museum we saw the statues, interesting weapons, photos and many other items. My friends and I played in the gardens with paper balls before returning to school. It was a day filled with fun and learning.

II - A

Educational trips are a part of our education system outside our classroom. We had such an educational trip to Victoria Memorial on 31st January organized by our school. It was a recreation time for us and a break from our studies. We reached there by bus and had our breakfast. Then our class teacher guided us, giving us a tour around the place. The lush gardens, beautiful landscape and flowers made us very happy. We liked all the marble statues of the royals, swords and the paintings of Queen Victoria's life. Then we played many games in the park. Our teachers took excellent care of us during the trip. We enjoyed ourselves and our minds were refreshed under the open sky with a lot of greenery everywhere around. Our class teacher called us to make a queue and we returned to school by bus.

II - B

I visited Victoria Memorial as an educational trip from my school on 31st January. The special attractions of the beautiful place are the architecture, garden, museum, its surrounding, the statue of Queen Victoria and the artifacts. The architecture of Victoria Memorial is beautiful and grand. The gardens are well maintained. The museum displays historical things. The surrounding is very peaceful. The statue of Queen Victoria stands tall. The artifacts are not allowed to be touched by the visitors. It was a lovely experience.

On 31st January, our school, St. Joseph's College, organized an educational trip to the Victoria Memorial in Kolkata. We were all excited and gathered at school at 9:30 AM, we set off for the trip, singing songs along the way. When we reached Victoria Memorial, we took a group photo with our juniors. As we entered, we noticed beautiful stone pathways with pebbles on the ground. Inside, we saw many fascinating exhibits, including ancient coins, paintings, and historical documents. There was also a large ship model, a cannon, and many other artifacts from the British era. After exploring the museum, we went to the garden to play with our balls. The garden was filled with vibrant flowers, lush green lawns, and peaceful surroundings. We had our lunch there. Later, we played some games and enjoyed the fresh air before heading back to school. It was a memorable trip, and I learned a lot about history while having fun with my friends.

III - B

On 31st January, 2025, I went to visit Victoria Memorial. The Victoria Memorial is a marble monument in Kolkata. It is located in front of the Brigade Parade Ground. There are twenty-five galleries that show different facts of History. There are old swords, guns and cannons to attract the visitors. The foundation stone was laid by Prince Edward VIII. People from all over the world visit Victoria Memorial to admire its architecture and learn about it. The gardens around it are very pretty with lots of flowers and fountains. On top of the building, there is a special angel statue that spins with the wind. The visit to Victoria Memorial is like stepping back in time. It is a great place to explore and imagine what life was like long ago.

IV - A

It was a bright sunny morning. We were all very excited thinking about the visit to the Victoria Memorial. We sat for some time impatiently in our classroom. Everyone says that Victoria Memorial is a great place to go for a trip, but we never experienced the same until one day our school planned to go there for an exciting Educational Trip. As we entered, we were very excited to explore it. Wow! What an amazing site it was. We were amazed to see the huge park with a historical museum which had many historical paintings, sculptures, weapons etc. It also had gardens with beautiful flowers which were very well maintained. We played with our friends and teachers, had a great variety of food and enjoyed to our fullest there. It was an adventurous and memorable trip. We hope our school continues to plan such amazing trips every year.

IV - B

On a cool morning, we got ready to go to school, all excited for the trip. Though it was a long wait in school, when we reached Victoria Memorial, we were very excited. This was our first trip from school with our friends. We visited the museum and learnt a lot about the monument's history. We enjoyed sharing our food with our friends and playing games was great fun! We were sad when we had to return. Our parents were eagerly waiting for us to know all about the trip. It was a trip we will never forget!

V - A

We, the students of Class 5A, were beside ourselves with excitement when our class teacher informed us that an educational trip to Science City had been planned for us. Everyone was planning - planning for food to share, games to play, songs to sing and of course the the Museum featured big in our plans. The trip to and fro by bus is a great adventure by itself because we could sit with our friends, share our thoughts, laugh and giggle as we wished and sing loudly to our delight. The teachers smiled at all our antics, keeping a stern lookout lest we step out of line. Science City is a fascinating venue with its beautiful gardens and science inspired installations. The exhibits in the Museum were captivating. My friends and I found some of the exhibits so interesting that they were more like magic than science.

V - B

Since junior school, I had eagerly awaited the chance to go on a school picnic. My wish came true when our class was taken on an educational trip to Science City, Kolkata, on 31st January. Science City, inaugurated on 1st July 1997, is a major attraction showcasing science and technology in an engaging way. Excited for the trip, I reached school early, where all students were dressed in PT uniforms, ready for the adventure. We boarded the buses around 9:00 AM and soon arrived at Science City. After playing on a big ground and having our tiffin, we explored various science exhibits. I was fascinated by demonstrations on aircraft wings, friction, bubble formations, and the mirror maze, which was both eerie and fun. After the visit, we returned to school by 2:00 PM and were dispersed by 3:00 PM. It was a memorable experience, though I wish I had more time to explore all the exhibits.

V I - A

Science city, a place where imagination knows no bounds. Where Science mixes with fun to produce learning that is loved by children. Science City were is like a Disneyland for Knowledge. When one goes to Science city, he/she has to life something that is displayed. For me, those are:- Pneumatic Mail, Two Rising Arcs, Infinite Well, The Flying Disse

V I - B

Our visit to Science City was an exciting and informative experience. As students, we explored various interactive exhibits that made learning fun. The space gallery amazed us with models of planets and satellites, while the robotics section introduced us to artificial intelligence. The 3D science show and digital planetarium gave us a closer look at the wonders of the universe. We also enjoyed the life sciences section, where we learned about the human body and ecosystems. The earthquake simulator was both thrilling and educational, showing us how seismic waves affect the Earth. The biodiversity park and aquarium showcased different species of plants and marine life. This trip not only deepened our scientific knowledge but also inspired us to think beyond textbooks. Overall, Science City proved to be a perfect blend of education and entertainment.

VII - A

On 31st January we took the class to Science City. It was an organized educational tour. The boys of class 7A enjoyed the same. They learned many things. They went to the dynamotion to witness the Formation of Tornado, Transverse wave, Infinity Well, Shuttle Bus, Sun Dial, Space Travel, etc. They learned optical illusions and got lost in the mirror maze. They saw different types of fishes. One of the boys learnt about the constitution of the plane. We returned to school at 3:00 p.m.

VII - B

We went to science city for an Educational trip from our school .We played and enjoyed in a big playground inside it. Later on we went for an educational tour to see the different scientific achievements. There was a cycle and we had to do cycling which exerted air pressure to move a metallic ball upwards. We saw the models and live specimens of different plants, animals, galaxies and asteroids. We saw some amazing fishes like the Piranha. We also saw the infinity well. We enjoyed, had fun and it was also very enriching for us.

VIII - A

The educational tour to Science City was an enthusiastic experience and we enjoyed it a lot. We were given our biology project to be done at the Science City park. It was so fantastic and knowledge gaining. We were taken to the space Odyssey, maritime centre and many more places. We reached there through a bus which was so cozy and comfortable. The tour helped us to improve our knowledge.

VIII - B

Our visit to Science City was an enriching experience that sparked our curiosity and deepened our understanding of science and technology. It was a perfect blend of fun, education, and inspiration. This trip not only enhanced our knowledge of various scientific fields but also motivated us to pursue more hands-on learning experiences in the future. Science City stands as a testament to the power of interactive education, and we left the trip with a greater appreciation for the role that science plays in shaping our world.

I X - A

Our school, St. Joseph's College, took us on an educational trip to Science City, and this is my take on it. There was a visible environment of great excitement among the pupils. Broad beaming smiles, full of bliss and liveliness were eminent on every face, not because of the trip, but because of the joy of being able to spend time with their friends. The bus ride to and back from our destination was probably the best part. A group played football while some played badminton and others had a cricket match going. The pure joy among the boys brought a smile to the faces of the teachers. On reaching the school gates we felt as if the day had passed within the blink of an eye!

However, I can say that it was a day worth remembering. Jealousies and conflicts were halted, nurturing new friendships and brotherhood and heaps of memories were made that would be cherished and last forever .

I X - B

On the 31st of January 2025, our school organized an educational trip to Science City. The exhilaration was palpable as we looked forward to spending the day with friends. During our visit, we explored various exhibits and participated in engaging activities. Some of the activities we participated in are : Mirror Maze, Foucault Pendulum, Floating Dish, Jumping Disc, Frictionless Path.

We enjoyed this Science city visit as it is an ideal place to supplement education beyond traditional classroom teaching. Our visit to Science City was an enriching experience that exceeded our expectations.

The bus ride to and fro were made enjoyable with music. It was a relaxing, fun filled and learning experience for all of us. Overall, everybody loved the educational trip and we all would love to experience these kinds of trips once again as a class.

XI - A

On 31st January the students of class 11A went to Science City. It was an organized educational tour. We enjoyed the day with awe and interest. We learned about many out of the book yet essential concepts and simple fundamentals of science, which have wide applications in daily life. The sundial, bouncing back of sound by concave reflector, Mobius strip which is a single plane appearing to be double, mechanical action of fluids specially caught our attention. We went to the dynamotion gallery to witness the Formation of Tornado, Infinity Well, Shuttle Bus, perpetual motion, electric arc, coloured shadow, Space Travel, etc. We learned about optical illusions and almost got lost in the mirror maze. The amazing aquarium amazed the boys. We saw fishes like Piranha, Angel Fish, Silver shark, Tiger sharks etc. We returned school at 3:00 p.m. with joy in heart and new scientific hypothesis in knowledge.

X I - B

Our school recently took us to an educational trip to science city. Being a commerce student, I was excited to visit the most famous museums of the city. I was thrilled as it promised the blend of education and entertainment. The journey started and as we reached there, the grand entrance of Science City caught our attention. After a short waiting time we entered the museum. After a few hours, we were divided into different groups and set off to explore. We visited the Dynamotion Hall, it was a large spiral shaped building offering an exciting journey in the world of science. Here one could make his own music by stepping on the floor piano, float a ball through a pipe or peep through an infinite depth. The best was the mirror maze where everyone instead of finding the path was enjoying inside it, the activities were combined with dynamics of light and sound. The hall also had a small shop selling different types of attractive toys, we also had learned about many different scientific features.
